Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 06 December 2001.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Nakao et al (US Patent 5,156,609). The reference discloses in figure 25 discloses a method of inserting a plurality of surgical clips and deforming them so that a portion of tissue is clamped. Element 200 is considered a retainer.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Art Unit: 3731

Claims 7-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nakao et al. (US Patent 5,156,609). Nakao et al is silent as to the pushing force for advancing the clips. The PTO lacks the ability to test each invention submitted. The examiner believes it would have been within the purview of one having ordinary skill in the art to advance Nakao's clip with the pushing force limitations as recited in claims 1-4.

Claims 22-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hooven (US Patent 5,383,880). The patent to Hooven discloses a method of operating a flexible surgical instrument and an inherent pushing force by providing a flexible surgical device having a flexible outer tubular member 60, a flexible advancing element 61 extending through the outer member and a handle 42 coupled to each member. Hooven is silent as to the pushing force caused by the handle on said advancing element. Hooven is silent as the actual pushing force. Hooven clearly teach some force is required to actuate the device. The PTO lacks the ability to test each invention submitted. The examiner believes it would have been within the purview of one having ordinary skill in the art to advance Nakao's clip with the pushing force limitations as recited in claims 22-25.

Allowable Subject Matter

Claims 11-21 are allowable over the art of record.

Claims 4-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
